### Vikram Solar's strategic tie-up for Finland's market

Tier 1 solar module manufacturer Vikram Solar has entered into a strategic partnership with Finnwind, making the system integrator, manufacturer and installer of renewable energy systems the exclusive supplier of Vikram Solar modules for the Finnish market. Vikram Solar's polycrystalline Eldora solar modules are suited to the extreme conditions in Finland. JuhaPölonen - Partner, Sales and Marketing at Finnwind Oy said, "Finland has harsh weather conditions and solar panels must not only resist the heavy snow loads but also perform for many years under these conditions. The fact that utilities have already had positive experiences with Vikram Solar modules is another important factor for our customers and partners in the energy industry."
